-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 June 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Applicant's election of group 1 claims 1-3 in the reply filed on 6/2/09 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2003-183459 or Sobajima et al. US 5,747,576 or Sugita et al. US 2006/0199891.

3. Each of the cited patent documents teaches polypropylene molding compositions. The polypropylene described in these documents is seen to meet the claimed polypropylene (A). The claimed thermoplastic elastomer (B) is recited in an amount of 0%. As such, this is not a claimed component and does not further limit the claims. The cited documents further teach the incorporation of talc. Absent a translation, the size talc used in JP 2003-183459 is unclear. The Sugita patent describes talc having the particle size at [0069] of the disclosure. Sobajima describes talc having the claimed particle size in the abstract and column 4 lines 17+. The difference between the cited art and the claimed invention is that the art fails to provide

an anticipatory example or describe with sufficient specificity, the claimed invention so as to constitute a rejection under 102. The descriptions in these documents identifies a talc having a particle size as claimed. As such, one having ordinary skill would be motivated to select a talc as claimed and incorporate it in the polypropylene composition. As such, the claims are rendered prima facie obvious. The results in the specification have been considered but fail to sufficiently rebut the case of prima facie obviousness set forth herein. The results fail to compare the closest art with the claimed invention.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.
